

Austin Police Academy Memorial Marker Project

In 2003 the 107th and 108th cadet classes collected funds from their classes to be earmarked for a police memorial to be built after the construction project for the new public safety training campus was completed. Some subsequent academy classes also donated money to be used for this project as well.

In 2016 a committee was put together to see the project to fruition. Several meetings were held to study the idea and work through the planning and logistical challenges. The committee called upon Debbie Weir from Cook Walden Funeral Homes to help in the process due to her connection to vendors that would be able to create graphic renderings and provides cost estimates to their designs.

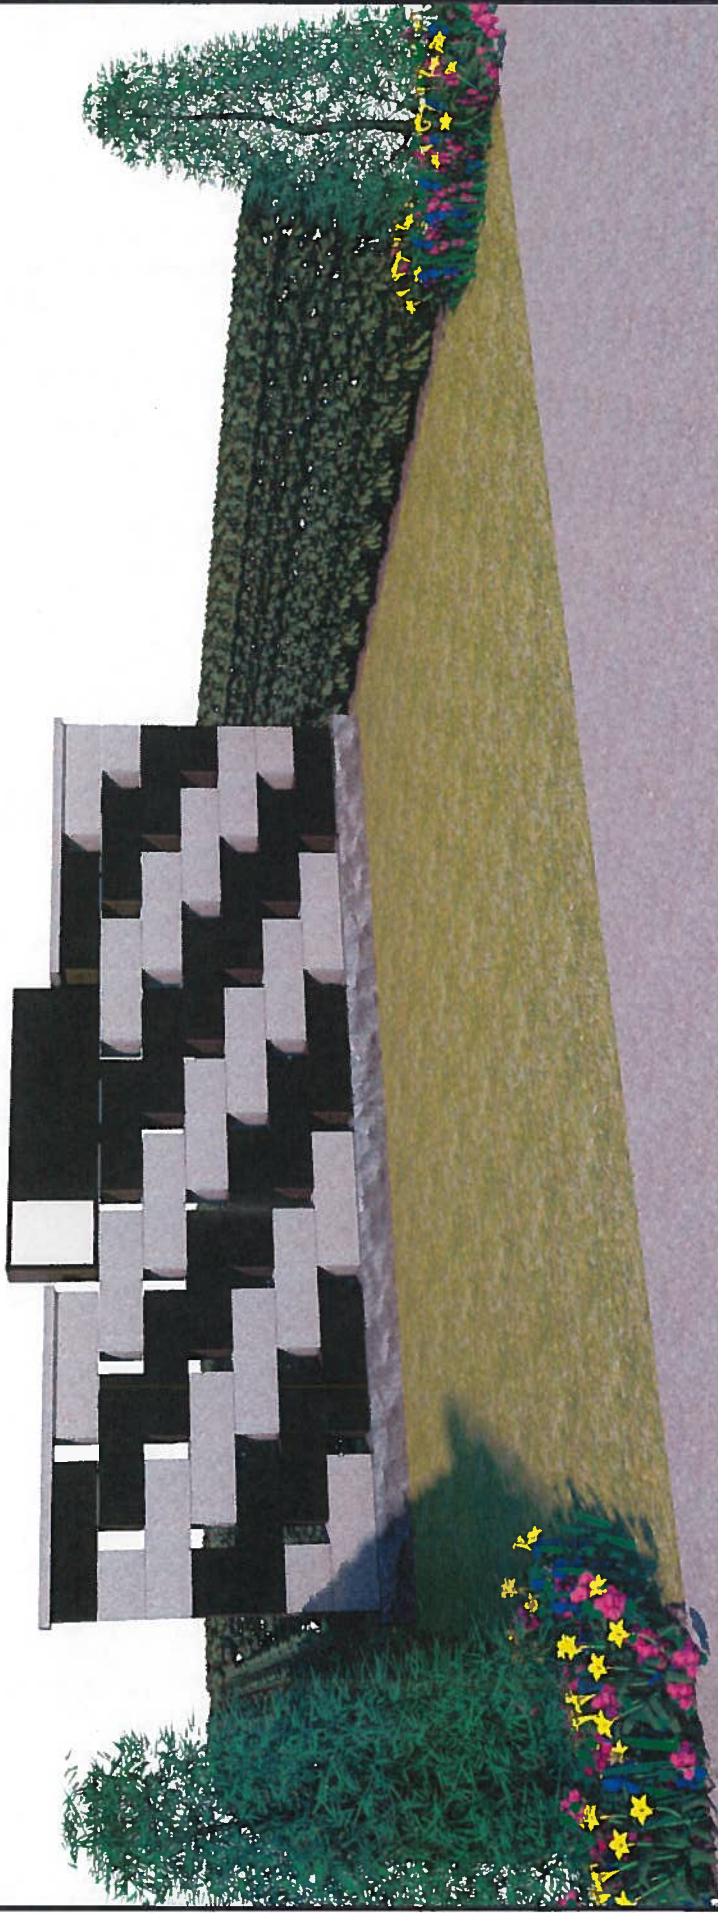

After several meetings and working through a few different ideas and concepts, the committee was able to come to an agreement on a design. The design has space for 37 names of fallen officers and APD current has 23 names that would need to be added to the memorial. In the future if/when all the spaces were to be used, the design allows expansion. The memorial would be placed on the grounds between the pistol range and the old main building. Cook Walden has graciously agreed to have their staff install the memorial thereby avoiding additional expenses.

There is currently roughly \$3,700 already raised for the memorial marker. As of January 2017 the quote for the cost of the current design is \$8,524. With the expected additional expenses for landscaping, lighting, and site prep, we would need to raise an additional \$10,000 to ensure we have sufficient funds to complete the project.

Attached are the graphic renderings supplied to us by the vendor that Cook Walden is using for this project.

- The first attached photo is the overall graphic of the design of the memorial.
- The second photo gives the complete measurements of the memorial.
- The graphic at the top of the third photo is an illustration of the top middle block on the memorial. The graphic below it illustrates how each individual block appear. It will have the name and end of watch date along with the type of badge the fallen officer was issued during that era.

Once given approval I want to work through C4C and begin to raise the needed funds to complete this project.
